## The Joy of a Record that is Virtually Noiseless

THOSE grinding, scratching surface noises that have so insistently made themselves heard through the music you love will now annoy you no more. Because Columbia has discovered a process which produces a phonograph record surface so fine in texture, so marvelously smooth that the needle travels over it almost inaudibly.

This new and unbelievably quiet surface makes the phonograph what it should be, a musical instrument of the highest and purest type-giving you every inflection, the most delicate phrasing, exquisitely expressed shades of harmony that have previously been lost in obtrusive surface sounds.

The new Columbia Records out today are all made with this ultra fine, ultra smooth and quiet, new surface.

And among them are two you'll want at the very first whirl-"All for the Love of Mike" and "You Can Have Him, I Don't Want Him, Didn't Love Him Anyhow Blues." Both are by Van and Schenck -singing in their happiest of happy harmonies. And they are deliciously free from irritating scratch or scrape.

Tear out the accompanying list, take it to a Columbia Dealer and listen to any or all of these New Process Columbia Records. Note the smoothness and fullness of tone. Note the beauty of expression. Only in New Process Columbia Records will you find this new and quiet surface. The process is patented.
